

eMAR

Client Care

Solana's electronic medication administration record (eMAR) solution includes the primary intelligence that drives and automates nursing and caregiver functions. Auto-schedule medication and events such as vitals,

treatments, exercises and tasks, run reports, schedule calendar functions and manage the customized alerts.

Text or

email alerts are sent within minutes of the time tolerances you set, allowing staff to respond quickly to emergencies or critical issues.

Cost-Effective Web-based Technology

With eMAR, you do not need expensive hardware or licensing. Offered as a monthly subscription, all eMAR updates and upgrades are included free of charge. We offer the highest quality product at the best value on the market.

With the optional pharmacy interface you can also:

- Auto-schedule medications
- Bring new clients into eMAR directly from the pharmacy
- Match the pharmacy labels to the MAR
- Complementary to ADM technology
- Receive instant pharmacy notification if a facility adds, edits or deletes medications

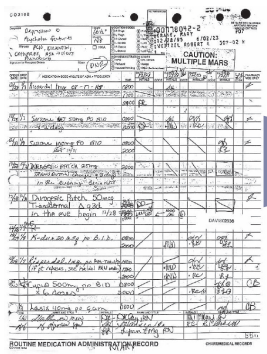

Quick Implementation, Rapid Return on Investment

The implementation process is as simple as having internet access. There is no additional hardware or software to install. Once your agency is up and running, the incurred cost savings are impressive.

In fact, one agency realized \$130,000 in annual savings using eMAR. These savings occurred in conjunction with uninterrupted services to clients and a reduction in medication errors.

Problem	eMAR Solution
Illegible MARs stuffed in drawers	eMARs are legible and can be accessed from any location, even in the event of an audit.
MARs become out-of-date as medications change	Instant medication changes and up-to-date MARs.
High staff turnover increases training costs	Online training frees staff to focus on their clients.
Audits	Med error reduction. Instant MAR access. Don't risk your license!
Medications not given or not administered in a timely manner	Increase staff accountability with customizable text alerts.
Managing multiple homes	Reduce labor costs with web-based monitoring.

Go from this...

To this kind of eMAR!
